If you want to enhance reflections or create alternative mixtures, pigments can be mixed together in a manner consistent with colorimetry principles and the result you wish to achieve. Examples: WARM CHESTNUT BROWN: AUTHENTIC CHESTNUT (15 drops) + RED ENERGY (10 drops) / PEACH PINK: RED ENERGY (15 drops) + SUNNY ORANGE (10 drops).

To obtain a more delicate pastel effect, decrease the drops of HMELT.

For longer duration of the reflection treatment, after applying HMELT, rinse with water without shampooing and/or conditioning.

To obtain pastel effects, leave on for at least 15 minutes.

Any correction of undesirable effects will depend on the degree of lightening.
